Management report

On operating results

In the first three quarter of 2026, Capitalia reported a turnover of EUR 1.53 million and a profit of EUR 57 thousand. The operating revenue and profit continued growing and we expect the same in the last quarter.

On key events

During the 3rd quarter of 2026, we managed to issue a funding amount of EUR 4.5 million (EUR 4.9 million during the second quarter of 2026). Among the financed businesses during this period were, larger loans were issued to wholesale trade, retail trade, and real estate activity companies.

On plans for the next quarter

We anticipate stronger growth in Q4 as it is often a more active season for SMEs financing. We continue active outreach to potential borrowers, while the available capital of investors to be deployed in business loans continues to be at record levels.

_____

Juris Grišins
Chairman of the board

Riga, October 28, 2026

Summary of financial performance

The summary of financial results portrays the development of key financial indicators of Capitalia over the last reporting period. Total assets and loan portfolio on the books have decreased compared to the previous reporting period. Equity capital is EUR 598 thousand while profits were reported at EUR 57 thousand. Equity and other liabilities subordinated to the outstanding bond issues constituted 35% of the total assets or well above the benchmark bond covenant of 20%.
